COME TO TIME IN WATER MATTER

Morris Administration at Last Succumbs to Indignant Protests of Citizens.

BEGINS TO USE MILLIONS GALLONS OF WASTE WATER

After Giving Salt Lake a Black Eye, Authorities Suddenly Awake.

The Morris administration has at last succumbed to the indignant protests that have come in from all quarters, and last night began the use of the millions of gallons of water that have been running to waste in the ditches for sprinkling the streets. Today this plan will be still further reinforced by the use of fire engines to pump the water from the ditches into the sprinkling carts, so that the clouds of dust that have been enveloping all sections of the city, and particularly the business districts, may have some re-

Gave City Black Eye.

Hesitating for weeks and diliy-dallying until the tourist season has practically ended, and having given as bad a black eye as possible to Salt Lake City, the administration has at last come to the conclusion that it could withstand popular indignation no longer, and has begunthe plan which The Tribune has been urging for weeks.

Flume Is Built.

Street Supervisor Snedden yesterday constructed a flume from the city canal at Sixth East and Fourth South, and also one on Fifth East, between Brigham and First South, from which water can be run directly into the sprinkling carts, without any force or pumping. From these the sprinkling carts began last night to take water and sprinkle the streets that have for the past four days been dry as a bone.

Constructing Pipe Lines.

He also commenced the construction of pipe lines on Fourth East, between Brigham and First South, and on State street, in front of the Alta club, from which the water is to be siphoned into the carts. He also has secured the use of some flowing wells on Second West, between Fourth and Fifth North, from which the northwestern part of the city will be supplied.

Will Use Fire Engines.

In addition to these sources of supply, Mayor Morris instructed Chief Bywater to make use of several fire engines that are not imperatively needed in the department. These will be stationed at several convenient points, where the ditches will be dammed and the water pumped into the sprinkling carts. Sprinkled With Ditch Water.

The lawn at the cify and county build-ing will be sprinkled by a fire engine with ditch water. By this means it is hoped to sprinkle more than half the city, and the business districts will be entirely

Saving Precious Fluid.

It has required no great amount of rea-coning power to evolve this scheme of saving the supply of water that runs in the pipes to supply the citizens with the precious fluid for culinary and drink-

Has Always Been Feasible.

The Tribune, more than three weeks ago, urged the Morris administration to take this step, but its urging has gone unheaded. Not until the meeting of citizens to be held at the Commercial club tonight to discuss the water situation was called did the Morris administration take need. This sudden activity can not fail to be noticed. If the plan is feasible now, it was feasible all summer.

Sprinkling Carts at Work.

Street Supervisor Snedden expects to have the sprinkling carts going full blast

NOT A GOOD DAY, EITHER Eight Divorce Decrees Granted by

Judge Morse Friday.

Eight divorces were granted by Judge Morse at the first regular ladies' matinee of the present term of court. The mismated couples who were granted relief from the thralls of matrimony were Matilda A. King and John King, Laura Matilda A. King and John King, Laura Orton and John H. Orton, Luia M. Norwood and Harry W. Norwood, Zina E. Jennings Pratt and Valton Merrill Pratt, Grace Williams and Saxon Williams. Esther Fransom and William H. Fransom. Elizabeth Roberts and Robert Roberts. In all the cases the principal ground of divorce was desertion and failure to provide. Mrs. Grace Williams, was granted \$500 alimony against Saxon Williams, who is a well-known bicycle rider. Mrs. Pratt was granted \$50 a month alimony.

Mister, can you tell me who is the best specialist in Salt Lake? Yes, sir. Dr. C. W. Higgins, at St. Elmo hotel.

ABOUT FT. DOUGLAS

What Is Going on at Uncle Sam's Military Post.

Military Post.

Contract Dental Surgeon William H. Ware, U. S. A., and Mrs. Ware, have arriver from Fort Duchesne, Utah.

First Lieut A. B. Sloan, Battallon Adjutant, Twenty-ninth infantry, is expected to arrive from Fort Duchesne in a few days, on leave of absence. It is expected that Mrs. Sloan and family will return with him to Fort Duchesne.

Ben Burk of Holbrook, A. T., has been appointed post carpenter.

Second Lieut Edwin O. Saunders, Royden E. Beebe and Albert G. Goodwyn, Twenty-ninth infantry, stationed at Fort Douglas, have been detailed as members of the class for instruction in military signaling.

Notice to Hunters.

Guns repaired, work guaranteed, at Main's, 103 E. 2nd So. Ind. Fone 2136.

Telephone Company Incorporated. The Eastern Utah Telephone company of Price, Carbon county, with a capital stock of \$50,000, filed a copy of its articles of incorporation with the Secretary of State yesterday. The directors are Reuben G. Miller, president, A. McGoverney vice-president, Arrive and Carbon, and Goorge Y. W. Nixon and George Y. Waliace. The last named is president of the Rocky Mountain Bell Telephone company.

WHITEWASHING MACHINE FILE PETITION FOR USED AT FAIR GROUNDS

Every Inch of Woodwork Glistens in Its Coat of White.

As far as the grounds, buildings and race track are concerned, the State Fair of 1965 might start on Monday morning ustead of two weeks from Monday. Th olg job of whitewashing the stables, ences, stalls, slieds and outbuildings was fences stains, spear one obtainings was finished yesterday. Every inch of the woodwork glistens bravely in its cont of white and the vista presented from the west gallery of the new hall of manu-facturers and liberal arts, where a big window overlooks the grounds, is entirely pleasing.

pleasing.

The work of quick and smooth white-washing was one that puzzled the directors considerably. To do it in the old-fashioned way would have been impossible. Too much time would have been consumed. Besides, the old method of laying whitewash on with a brush by hand has never been satisfactory because the liquid could not be laid smoothly on all parts of the surface under treatment. There must be some better method, the directors concluded.

Used a Machine

Used a Machine.

Finally President McDonnid heard of a whitewashing machine that was in service in the Bear river country. He dispatched a representative to close a contract for its use here. Before the representative could reach the owners of the machine they had come with it to Ogden. There they were found and a deal arranged. A week or ten days ago they came to Sait Lake and began spraying whitewash on the State fair buildings. Now, as stated, the work is finished, and a beautiful job it is.

Innortant Decision Reached.

Important Decision Reached.

An important decision Reached.

An important decision reached yesterday by the directors was the postponement of Salt Lake day from Monday, the opening day of the fair, to Tuesday October 2. Inquiry developed the fact that it is extremely difficult and involves a considerable loss to merchants, to close the stores and business houses on Monday afternoon. The intervention of a Sunday holiday between Saturday and Monday renders it necessary for many people to do their shopping on Monday and they, as well as the merchants, would be seriously inconvenienced if the stores were closed.

Monday Derby Day.

Monday Derby Day.

Accordingly, Monday will go down into the records of the fair as Derby day. The most important running race, the State Derby, a mile distance for a handsome purse, will be run Monday afternoon. In iddition, ther will be such other races and attractions as will justify a large atendance. And on Tuesday the stores and oblic and private offices will be closed at o'clock in the afternoon so that the vorkers will have an opportunity to so 2 o'clock in the afternoon so that the workers will have an opportunity to go out and mingle with the State fair

Contract With Steiner-Ellett Troupe. Secretary Cox yesterday closed a con-tract with the Steiner and Ellett troupe of acrobats. This company will give free open air exhibitions and will prove an in-teresting addition to the already long list of free performances.

Vocal Music.

Elanor C. Putnam, teacher of vocal nusic, pupil of Edmund J. Myer, New York, and of Smith College School of Muic. Studio 121 Eighth East. Bell telephone 1682-Z.

MASONIC TEMPLE STARTED

First Spade of Earth Turned in Excavation for Foundation.

The contract for excavating, prepara-tory to the building of the new Masonic temple, has been let, and active work was commenced yesterday afternoon on the lot at First South and Second East streets.

What Was Done.

No special ceremonies were had at the first step taken in the construction of this handsome edifice. Christopher Diehl, a thirty-third degree Mason, and secretary or the Grand lodge of Utah, was given the honor of removing the first spade of dirt. The building committee, composed of C. W. Morris, Dr. H. N. Mayo, S. D. Evans, J. H. Brown and F. C. Schramm, each their place at the spade in the order

Cost of Temple.

The lot upon which the temple will rest, the furnishings and the building combined will cost the Masons about \$100.00, and the temple will be one of the most attrac-tive buildings in the city.

Corner-Stone in November. The corner-stone will be laid with the

usual impressive ceremonics some early day in November, and it is thought that the temple will be ready for occupancy much earlier than expected.

To Whom It May Concern:

GEORGE HANSON, J. C. JENSEN.

SUGAR DIRECTORS MEET

Report of Condition of Crops Sub

mitted by Manager Cutler.

Boards of directors of several of the sugar companies having headquarters in this city held meetings yesterday morning. The condition of the beet fields, both north and south, was reported by Manager Cutier, who said that recent storms had made the outlook more encouraging. This was especially true, he said, of Sugar City, Idaho Falls and Garland.

Owing to the losses which many beetraisers suffered because of blight, drouth and white fly, the Utah Sugar company board decided to make an allowance to farmers suffering total loss, by reducing the charge against them for seed and planting. Heretofore this charge has been borne by the farmers and paid to the company when crop settlements were adjusted, and the action of the company this year will be greatly appreciated.

The board of directors of the Idaho Sugar company has decided to increase the capital stock from \$1,00,000 to \$5,00,000, the increased capital to be left in the treasury of the company for future needs. Within the next thirty days \$50,000 of this amount will be sold to stockholders, the remaining \$1,50,000 to remain in the treasury indefinitely.

With the cash realized from the sale of \$50,000 in stock, the balance due on the Boards of directors of several of the

remaining \$1,500,000 to remain in the treasury indefinitely.

With the cash realized from the sale of \$200,000 in stock, the balance due on the purchase of the Snake river factory will be paid, railroad spurs into new beet fields will be built and the Steffen's process now being installed in the Sugar City plant will be completed. This will put the Idaho factories in a condition where they will be able to handle a greatly increased tonnage next season. The regular dividends of the preferred and common stock of the Utah Sugar company were posted, nayable September 30, the books to close September 23 and to be reopened October 2.

9000 BELL TELEPHONES IN SALT LAKE SEPT. 15

Gain of 2000 Since January 1. This phenomenal increase made pos sible through the endorsement of the people.

FOREST RESERVE

Secretary Wilson Is Appealed to by Residents of Millard County.

WANT WATER SOURCES PROTECTED FROM CATTLE

Claim Overgrazing Has Denuded Mountains and Imperiled the Water Supply.

Senator George Sutherland yesterday forwarded to Secretary of Agriculture Wilson at Washington the petition of twenty residents of Millard county asking that a new forest reserve be set aside in the mountains situated above the towns of Kanosh, Meadow, Flilmore, Holden, Oak City and Learnington

Strong Resolutions.

Accompanying the petition is a set of resolutions adopted at a convention held in Fillmore on September II, the resolutions strongly favoring the establishment of said forest reserve. The convention at which the resolutions were passed was called for the express purpose of taking such steps as the citizens deemed necessary to have the Government adopt measures to preserve the sources of water supply in that vicinity. supply in that vicinity

What Petition Alleges.

What Petition Elleges.

In the petition, which is signed by twenty of the leading cilizens of Millard county, it is set forth that the mountainous section of Millard county and the mountainous section adjoining, constitute the water sheds in which moisture is deposited during the winter months of each year, this moisture feeding the streams that supply the towns of Kanosh, Mesdow, Fillmore, Holden, Oak City and Leamington with water for demestic, culinary and irrigation purposes, is, in fact, the only source of supply for these towns.

Overgrazing of Range.

Overgrazing of Range.

These mountains, according to the petition, are also the natural range for stock belonging to the farmers of the region, and in recent years has been excessively grazed not only by stock owned my the inhabitants of said towns, but stock brought in from other towns of the State. This over-grazing of the range has caused the grass, underbrush and natural vegetation of the mountains to rapidly disappear, with the result that the moisture deposited in the mountains in the winter, runs away at the first appearance of warm weather. So by the time the water is actually needed for irrigation purposes, there is none to be had.

Other Evil Results.

Other Evil Results. Still another evil results from the over-grazing of the mountains—the drying up of a number of the mountain springs. The waters, in running down the mountain sides, naturally follow the line of least resistance and instead of sinking into the ground, to come up later in the form of cool and refreshing springs, run down the well-beaten paths made by sheep and eattle.

Mountains Are Dusty.

So beaten have these paths become that the mountains surrounding the towns are almost as dusty as the streets of a busy city and every time rain falls during the summer months, dust and dirt are washed into the streams supplying the towns with water, making them for a time at least unfit for culinary purposes.

Ask Uncle Sam for Aid.

And so the people have met and de-cided to ask Uncle Sum to lend his aid by setting asido as a forest reserve the mountainous region named, that here-after forest fires which are now common because of carelessness of trespassers, may be prevented; and further, that the sources of valuable streams may be prop-erly preserved, protected and sufgagard-ed. It is suggested in the petition that the new reserve, if set aside, be known as the Pahvant forest reserve. new reserve, if set aside, the Pahvant forest reserve.

FORMER FAILURE TO BE TRIED AGAIN

City Officials Will Experiment With Plant Where Once They Failed.

"What I would like to know," remarked in old resident and former office-holder last night, "is what on earth the City Council wants to sink \$5000 up in Emigration canyon for pumping purposes, when my recollection is they had such a thing there once before. It seems to me that experience should have taught them bet One Plant a Failure.

"I remember not so very long ago, abou-eight years, the city had a pumping plan-in Emigration canyon, but the farmers who own one-seventh of the waters o

Emigration, and who compose a company known as the Emigration Dam and Ditch company, kept up such a campaign of litigation that the plant was dismantled. The two boilers were sold at a great sacrifice. Law-Suit Breeder.

"Now, if a numping plant eight years go could be done away with because it not a law-suit breeder, it looks to me if the city was on the way to repeat

Failure Then, Failure Now "And if such a plant was a failure then, what cause have we to believe that it will be a success now? I think that the city administration going into this matter again as they have is another ex-ample of the idloite conception they have of public affairs." public

Streets Get a Bath.

The sad plight of the business men along the main streets having been made known through The Tribupe, the city officials opened their eyes and saw that they were estrying the farce too far Consequently they busiled out a fire engine last night and gave the principal streets a good bath.

No Water in Pipes.

The people who live along streets where dust is six behes or more thick would appreciate a small portion of the water, running through the ditches and gutters to waste, put on their streets. All over the city last night it was necessary to carry water for the ordinary household uses. Very few were the localities that had enough water in the pipes to cook with, much less sprinkle their lawns.

Als. Epil of Dust

Air Full of Dust. All day Friday the air was full of suffe cating dust. On many of the residence streets teams created such a cloud of dust as to be almost concealed by it. Al evening a cloud of dust hovered over the entire city very much like smoke from a great mountain or forest fire.

Yet Gutters Are Full.

During all the trying day the gutters ran on and ran over in some instances. The millions of gallons which go to wasto by way of the Salt Lake gutters are a source of wonder and indignation to the citizens of the town. "Why cannot this water be put on our lawns?" is a question heard many times a day.

If you drink green tea, you do not know the pleasure of tea-the flavor of Golden Gate Ceylon Tea.

She expects to return and be in her studio in the Commercial club building on Monday, Oc-tober 2nd, where she will be pleased to see her pupils, and any others who de

TO HEAR INJUNCTION SUIT

Judge Morse Fixes Upon October 2 as Date for Hearing.

Judge Morse yesterday made an order setting the injunction suit of Amy J. K. Smith and others against the Silver Bros. Iron Works company for hearing on Oc-tober 2. The plaintiffs were given leave to make a motion at any time after next Tuesday for a temporary restraining order.

order.

The last mentioned order was in accordence with an agreement of the defendant company to abate by next Tuesday a part of the nuisance alleged in the petition by stopping the operation of a large electric hammer that it is claimed makes an amount of noise that is car-splitting to residents of the locality of the iron works.

See Gwinn, the expert, and get your business systematized. Room 35 Eagle block.

Alleges Persecution.

That because of physical infirmities he had been persecuted by other hotel runners, was the plea offered by John Green, an employee of a local hotel, who was arraigned before Judgo Diehl Friday on a charge of assault with a deadly weapon. Green, who was represented by Attorney Largent, waived his presented by Attorney Largent, waived his presented as held to the Dietrict court with bonds fixed at \$170, which have not yet been furnished.

ROYAL BREAD is the clean bread made by clean method in a clean bakand every loaf bears the CROWN LABEL. Ask your grocer for it.

Allowed to Leave Town.

Williams and F. Mergan, alleged graft on a charge of vagranc their pleas from not guilty to guilty Friday and were given six hours to get out of town.

ENDS LIFE WHILE LOCKED IN CELL

Thomas Tobin of Anaconda, Mont., Chose the Morphine Route.

CARRIED CARDS IN K. OF P. AND B. L. T. SOCIETIES

Nothing Can Be Learned as to How the Man Secured Poison.

Thomas Tobin, aged 32 years, a prisoner at the City fail, was dicovered at noon of Friday, in his cell, unconscious from the effects of morphine. He died at 5 o'clock, although strenuous efforts were made to save his life. City Physician Wilcox pumped the man out and administered the strongest antidotes without avail.

Was a Railroad Man. Was a Railroad Main.

When first arrested, five days ago, Tobin stated that he was switchman, out of
employment. Cards found among his
few effects show that he was a member
of the K. of P., lodge No. 15, Anaconda,
Mont., and of the Brotherhood of Locomotive Trainmen, No. 615, of the same
town. A letter also indicated that he had
a married sister living in New York city.

Probably Unfortunate. There was nothing about Tobin's appearance to indicate that he was of victous or eriminal habits. It rather seemed that, out of employment he had taken to drinking and had been on a lengthy spree. His \$5 fine on the occasion of his first arrest was paid by an acquaintance, but two days afterward he was again taken in for intoxication.

Jailer Is Puzzled.

Jailer Parry is puzzled to know where Tobin obtained the poison which ended his life. The prisoner was thoroughly searched, and it is not considered probable that any person outside the jail could pass the morphine into a cell without being discovered. Body Will Be Held. The body of Tobin will be held at the Morgue until communication is estab-lished with Anaconda, and an effort made to locate the dead man's immediate rela-

EXPRESSES WISH TO GET AT PRISONER

Sensation Sprung During Trial of Colored Man Charged With Vagrancy.

"I'd just like to have you in Texas for about fifteen minutes," hissed Officer Morris, in Judge Dichl's courtroom Friday afternoon, leaning forward and di-recting his words to Toy Smith, colored, who was charged with vagrancy, but the testimony of whose case indicated the commission of a far graver offense.

Officer Loses Temper.

Policeman Morris, who comes from a land where summary justice at the end of a rope is frequently administered to negroes, lost his temper, after evidence had been introduced showing that Smith had persisted in forcing attentions upon a respectable white girl and had written her letters, couched in affectionate terms.

Admits Writing Letters. Morris's outbreak caused a sensation in the room, but the negro coolly retorted: "I could not before gentlemen express where I would like to have you," and then the Judge obtained order.

Admits Writing Letters. Smith, who conducted his own case, admitted writing the letters, but declared to the court that there was nothing improper In his conduct. The matter was taken under advisement by the Judge.

UNIVERSITY GYMNASIUM Regents Have Promised to Raise Sum

of \$5000.

The need of more money to complete the University gymnasium has just brought to light an interesting story, going to show that the students came within an acc of loosing their gymnasium entirely. In making appropriations the last Legislature allowed their grants to so far exceed the State funds on hand that Gov. Cutler was under the necessity of using the knife mercilessly. When he came to the bill appropriating \$5,000 for the gymnasium he was about to put the knife in action, claiming that the amount appropriated would not even put a structure of the size desired under cover. To overcome this argument the regents found themselves under the necessity of making a pledge to raise \$5000. Of this amount \$1000 has been raised to date. of \$5000. raised to date.

Must Raise Money.

must Raise Money.

To build the gymnasium and meagerly equip it, however, used up all the money on hand. But before it can be used sewer and water connections must be made, entailing a cost of an additional \$2000. The board of regents, at a meeting held this week, let the contract for this work, and consequently they now have the pleasant task of raising in all \$5000. Will Soon Be Completed. Will Soon Be Completed.

The gymnasium will be completed with the exception of the plumbing work by October 5. However, some improvements and additions will be made later. On account of scarcity of funds it has been found necessary to omit the running track, the construction of which would mean an outlay of approximately \$350. Temporary showers for the boys have been installed in the basement until a story can be added on the back of the building, which story will extend over at the ends, making room for the two main entrances, one for college women and one for college men.

For College Women. With the exception of a small corner the entire basement will be used as a gymnasium for the college women. The first floor will be occupied by college men. This floor will probably be used as a dance half, as it is larger and superior in many ways to the old assembly half.

Physical Education.

During the coming year the department of physical education will assume considerable importance at the University Dr. Gowans stands at the head of the department, and is assisted by Prof. Babcock, Coach Maddock, Miss Edna Harker and Leo Marshall. The purposs of this department, in addition to furnishing students with the amount of physical activity that will keep them in perfact health, is to give such theoretical courses in hyglene, physical diagnosis, anthropometry and the physical graph of exercise as will prepare students to undertake the work of physical training in public schools and colleges. During the year all freshmen and some other specified students, will be under the necessity of doing more or less work in the gymnasium and in this department. Physical Education.

AT THE UNIVERSITY

One Hundred and Forty-Six Students

Registered on Friday.

Registration began at the University of Utah yesterday, and during the day 146 students puzzled out their courses, paid in their \$10 tuition fee and attended to a few other incidentals preparatory to settling down to hard work next Monday.

settling down to hard work next Monday. The first day's registration is aiways light, the older students generally refraining from registering until during the first week of school, but despite this fact, yesterday's registration exceeded by almost a dozen the number of registered students for the same day last year.

Interesting Innovations. The programme of classes, which was made public yesterday for the first time, announces a couple of interesting innovations. During the coming year classes will commence at 8:30 a. m. instead of at 9 o'clock, as has been the custom heretofore, and continue until 6:30. On Saturday a class will be given in mathematics and work will be conducted in the shops, physical and swing inboratories. These physical and sewing inhoratories. These changes are an evidence of the growth of the school. The subjects now offered are so numerous as compared with other years that these changes in the hourly programme have been found imperative. Campus Improvements.

Old students note with pleasure the many campus improvements which have been made and new students, although unconscious of them, will nevertheless enjoy them. In addition to the many large improvements which have been made in the line of building annexes, painting, calcimining and the partitioning off of rooms, some smaller and equally important improvements have been made.

Walcomed by Students Welcomed by Students. This year for the first time in the

tory of the university, the students have a room in which they can meet to con-sider and transact business, or entertain a visitor. Heretofore the balls or campus have been the only places of retreat on such occasions, and consequently the im-provement is welcomed by the old stu-

Reception Room.

"The students reception room," as it will be officially known, is located in the Library building. The walls have been papered, the floor carpeted and some chairs, sofas and tables set neatly about so that the room looks really inviting. Chronicle Remembered The Chronicle has also been remembered this year Twenty dollars turned over by last year's staff was more than trebled, with the result that the Chronicle office has some respectable furniture and a couple of rugs.
